

Duogastrone is receiving full recognition

In recent years, increasing use of the fibroscope has confirmed what clinical papers* have been saying for some time—Biogastrone and Duogastrone are highly effective, specific ulcer-healing agents. What is more—both gastric and duodenal ulcers have been seen to heal more rapidly than with other treatments. And because they eliminate the need for long-term treatment with antacids or anti-cholinergics, these preparations make economic, as well as therapeutic sense.

**more than 40 English language papers have been published on the clinical use of carbenoxolone.*

BIOGASTRONE

Carbenoxolone sodium capsules *heal* duodenal ulcers

DUOGASTRONE

Carbenoxolone sodium tablets *heal* gastric ulcers

VIVONEX

In the surgical and medical management of the bowel:

- * Produces no exogenous residue
- * Leaves the intestine virtually free of faeces before surgery
- * Provides total oral nutrition (even when there is minimal gastrointestinal function)
- * Rests the inflamed bowel – ideal for Crohn's disease
- * Limits physical and bacterial insult to fistulae
- * Contains no milk or milk by-products
- * Offers an oral alternative to parenteral feeding

The excellent fluidity and optimum concentration of Baritop 100 form a unique combination of properties which results in superior visualisation of mucosal detail. Carbon dioxide is incorporated as an effervescent agent to aid double-contrast procedures and enhance the exceptional palatability of the suspension.

Baritop 100 is the modern liquid barium specifically formulated to match the sophistication of present day equipment and techniques.

The elegant barium suspension at 100% w/v in convenient 300ml cans.

Converts to Noxyflex are legion among concerned clinicians and senior sisters throughout the country. To them we do not preach. To others we speak of the singular effectiveness of Noxyflex against the intrusion of bacteria. When Noxyflex is applied directly to the site of existing or threatened infection (irrespective of sensitivity to any other anti-bacterial agent) its performance is impressive. Our literature carries the weight of extensive clinical evaluation. Have you copies?

Its uses, and users, increase.

GAVISCON®

caps everything in heartburn

- protects the oesophagus from gastric reflux.
- suppresses the pain of heartburn.
- gives oesophageal mucosa the chance to heal.
- clinical efficacy confirmed in UK trial.

Curr. med. Res. Opin.
(1972), 1, 63.

Gaviscon contains: Alginic Acid BPC, Sodium Alginate BPC, Magnesium Trisilicate BP, Dried Aluminium Hydroxide Gel BP, Sodium Bicarbonate BP, Sucrose BP and Mannitol BP. Gaviscon is available as mint flavoured tablets and chocolate flavoured granules.

Further information is available on request from:

Reckitt & Colman
Pharmaceutical Division, Hull, HU8 7DS.

Q

How much Caved-S can an intractable duodenal ulcer patient take?

A

For a full year without relapse, 12 tablets a day for up to 16 weeks*

The Practitioner

June 1973 Vol. 210 pp. 820-823

* This dosage regimen was established in a recent trial of Caved-S on patients all with intractable duodenal ulcer and a history of more than six relapses in the year prior to the trial. Of twenty patients receiving 12 Caved-S tablets a day for 16 weeks, 12 had no relapse in a full year's follow-up, and the other 8 had two or one relapse in the follow-up year. All these patients had actually been referred for surgery, but surgery was avoided in all cases. Another similar group of 20 patients received 8 Caved-S tablets a day for 8 weeks - the condition of patients selected was too serious for controls with a placebo. Of this second group 3 had no relapse, 7 up to two relapses, and 10 up to 4 relapses in a year's follow-up.

No significant side effects occurred. Only one patient discontinued treatment, and he later resumed treatment successfully.

The authors conclude:

"Caved-S . . . should be given in high dosage before surgery is attempted in patients with duodenal ulcer who fail to respond to a low dose or other treatments."

Caved-S
the ulcer fighter

Licence No 0425/5000
Composition: Liquorice (not more than 3% glycyrrhizic acid) 380 mg., bismuth subnitrate 100 mg., alum. hydrox. gel 100 mg., light mag. carb. 200 mg., sod. bicarb. 100 mg., frangula bark 30 mg.; brown tab.

Clinical Tests of Gastric Function

ALASTAIR M CONNELL, *MD, FACP, FRCPE*

Provides a complete review of the subject from the medical and surgical points of view. The text not only gives an extensive review of the literature of the tests, with particular emphasis on recent studies, but also draws on material collected by the author, much of which has not been published before. For hospital physicians, abdominal surgeons, physiologists and clinical pathologists, this book is a valuable addition to current literature.
