EDITOR  
*British Medical Journal*  
GRACE WILLIAMS  
(*Technical Editor*)

**Gut** publishes original papers and reviews concerned with practice and research in the field of gastroenterology. The field is that of alimentary, hepatic, or pancreatic disease, and papers may cover the medical, surgical, radiological, or historical aspects. They may also deal with the basic sciences concerned with the alimentary tract, including experimental work. The report of a single case will be accepted only if it is of sufficient interest in relation to a wider field of research.

**COMMUNICATIONS** Two copies of papers and figures should be addressed to the Editor, *Gut*, BMA House, Tavistock Square, London, WC1H 9JR. Papers are accepted only on the understanding that they are not published elsewhere without previous sanction of the Editorial Committee. Manuscripts should follow the Vancouver conventions (see *Br Med J* 1979; 1: 532-5. *Gut* 1979; 20: 651-2). They should be in double-spaced typewriting on one side of the paper only. On the paper the name of the author should appear with initials (or distinguishing Christian name) only, and the name and address of the hospital or laboratory where the work was performed. A short summary should be provided at the beginning of the paper.

**ACKNOWLEDGEMENT OF MANUSCRIPTS** Manuscripts will not be acknowledged unless a stamped addressed postcard or international reply coupon is enclosed.

**ILLUSTRATIONS** *Photographs* Unmounted photographs on glossy paper should be provided. *Diagrams* These will usually be reduced to 2½ in wide. Lettering should be in either Letraset or stencil, and care should be taken that lettering and symbols are of comparable size. Illustrations should not be inserted in the text, they should be marked on the back with Figure numbers, title of paper, and name of author. All photographs, graphs, and diagrams should be referred to as Figures and should be numbered consecutively in the text in Arabic numerals. The legends for illustrations should be typed on a separate sheet. *Tables* Tables should be numbered consecutively in the text in Arabic numerals and each typed on a separate sheet.

**ETHICS** Ethical considerations will be taken into account in the assessment of papers (see the Medical Research Council's publications on the ethics of human experimentation, and the World Medical Association's code of ethics, known as the Declaration of Helsinki (see *Br Med J* 1964; 2: 177).

**SI UNITS** All measurements except blood pressure are expressed in SI units. In the text they should be followed by traditional units in parentheses. In tables and illustrations values are given in SI units, but a conversion factor must be supplied. For general guidance on the International System of Units and some useful conver-

sion factors, see *The SI for the Health Professions* (WHO, 1977). Such conversion is the responsibility of the author.

**REFERENCES** These follow the Vancouver system—that is, references numbered consecutively in the text and listed numerically with titles abbreviated in the style of *Index Medicus*. *Standard journal article*—(list all authors when six or less; when seven or more, list first three and add *et al.*): James A, Joyce B, Harvey T. Effect of long-term cimetidine. *Gut* 1979; 20: 123-4. **NB: Accurate punctuation is essential.**

**CORRECTIONS** other than printer's errors may be charged to the author.

**REPRINTS** Twenty-five reprints will be supplied free of charge. Further reprints will be available on payment of the necessary costs; the number of reprints required should be sent to the Publishing Manager on the form provided with the proof.

**NOTICE TO ADVERTISERS** Application for advertisement space and for rates should be addressed to the Advertisement Manager, *Gut*, BMA House, Tavistock Square, London WC1H 9JR.

**NOTICE TO SUBSCRIBERS** *Gut* is published monthly. The annual subscription rate is £37.00 in the United Kingdom and the Republic of Ireland, and \$89.00 by surface mail in all countries overseas. Payment for overseas subscriptions should be made in US dollars, i.e. US\$89.00 or in your national currency based on the prevailing exchange rate to the US dollar of that currency, payable to the British Medical Association. Orders can also be placed with any leading subscription agent or bookseller. (For the convenience of readers in the USA subscription orders, with or without payment, can also be sent to: *British Medical Journal*, 1172 Commonwealth Avenue, Boston, Mass. 02134. All enquiries, however, must be addressed to the Publisher in London.) All enquiries regarding Air Mail rates and single copies already published should be addressed to the Publisher in London.

**PREPAYMENT IS REQUIRED : CHEQUE PAYABLE TO INSERM**

**Antwerp (Belgium) May 1 and 2, 1981**

## “13th International Congress on Stomach Diseases”

*President:* Y. Van Maercke

*Topics:* Prostaglandins, Invasive endoscopy,  
Laser, Motility, Early gastric cancer

*Congress languages:* Dutch, French, English, German  
(simultaneous translation)

*Secretary:* Dr E. Van Moer  
Akademisch Ziekenhuis Antwerpen  
Wilrijkstraat 10, B-2520 Edegem (Belgium)

**TAKE IT EASY.....**

**.....in the later years**

**INOLAXINE**

**98% Sterculia - sugar free**

Helps to:

Lower intra-colonic pressure. Reduce distension and relieve discomfort. Restore normal bowel action.

*Prescribing information:*

Side effects: occasional flatulence and discomfort      Dosage: 1-2 heaped teaspoonfuls once or twice daily

**Basic NHS cost £1.40 per 175g**

*Full product information available on request*

**Dales Pharmaceuticals Limited**

## Symposia in Basic Gastroenterology

First Symposium of the Series:

**'ELECTRONMICROSCOPY OF THE GASTROINTESTINAL TRACT'**  
**LONDON—APRIL 7 1981**

Organisers: J. M. Polak, S. R. Bloom, N. A. Wright, M. J. Daly

*Invited speakers include:*

G. Burnstock, E. Solcia, M. Shiner, M. N. Marsh, A. D. Phillips, M. E. Elmes,  
D. Poynter, P. Toner, K. Carr, V. E. Gould, A. Ribet

**£5 including Lunch, Tea and Coffee**

*For further enquiries contact*

# *Reduced Subscription Rates for Junior Hospital Doctors Residents and Interns...*

## **GUT—The Journal of the British Society of Gastroenterology**

is available to junior hospital doctors in all parts of the world for a maximum of four consecutive years at **REDUCED Annual Subscription Rates.** (Thereafter, or when reaching consultant status, this special offer will no longer apply.) The following reduced rates are unchanged for the twelve issues published in 1981.

**Inland £17.00**  
**Overseas US\$40.00**

(The full rates are: Inland £37.00; Overseas US\$89.00)

*The opportunity to subscribe to this journal of international authority and repute at a substantially reduced subscription rate is one not to be missed by junior doctors seeking to specialise in gastroenterology.*

*Please complete the adjacent order form and send for your subscription. NOW.*

*Further order forms can be supplied on request.*

## Notes and activities

### XIII Meeting, European Pancreatic Club

This meeting will take place in Krakow, Poland, on 14-16 May 1981. Details may be obtained from Professor S J Konturek, Institute of Physiology, U1. Grzegorzeczka 16, 31-531 Krakow, Poland, or Professor H Goebell, Medical Department, University of Essen, D-4300 Essen, Hufelandstr. 55, Federal Republic of Germany.

### 3rd European Congress of Endoscopy

This will be held in Berlin, 14-17 June 1981. Topics will include diagnostic and therapeutic endoscopy, future development of endoscopy, confrontation of endoscopy and other techniques, microsurgery, ultrasonic diagnosis, and forensic medical problems in endoscopy. Details may be obtained from Priv.-Doz. Dr L Witzel, DRK Krankenhaus, Drontheimer Strasse, D 1000 Berlin 65.

## Books

**Recent Advances in Gastrointestinal Pathology** Edited by Ralph Wright. (Pp 374. Illustrated. £20.00.) W B Saunders: London. 1980.

This volume of reviews is based on a symposium held by The Royal College of Pathologists as recently as February 1980. There are sections on pathophysiology and on inflammatory diseases, but half the book is devoted to gastrointestinal malignancy. Most of the contributions make enjoyable and informative reading, although one or two are disappointing. The chapters on anaemia and the gastrointestinal tract and on gastrointestinal mucus are particularly good, and those on bacterial infections and on pseudomembranous colitis are helpful summaries of the present position. The whole section on malignancy is somewhat patchy but, in general, offers good summaries of current knowledge in the specialised areas covered.

On the whole this book is quite useful, taking into account the wide variety of subjects covered. It can be recommended particularly as a reference volume for institutional libraries, but many gastroenterologists will find in it much to interest them.

P D FAIRCLOUGH

**Incontinence and its Management** Edited by Dorothy Mandelstam. (Pp 233. Illustrated. £9.95.) Croom Helm: London. 1980.

Many previous books on incontinence

have been exclusively confined to the aged or to urinary incontinence, but this work offers a comprehensive guide to incontinence of faeces as well as urine among patients in general. Management involves a variety of professionals from the general practitioner and hospital specialist to the community nurse and social worker. Each of these individuals may be unaware of the role and problems of the others and the editor has attempted to give an overall picture, and to bring together the many facets of incontinence. It will give the hospital specialist insight into the social and community aspect of the problems and, conversely, those in the community will better understand what can be achieved by the specialist. The chapters on urological, anorectal, and gynaecological aspects written by experts will assist each of these specialists in understanding the mechanisms and management of incontinence in fields immediately outside their own.

This is undoubtedly a most useful book. It tries at all times to be practical with instructions in analysing incontinence, and gives a useful account of equipment and appliances which may be necessary and a glossary for those unfamiliar with medical terms. It is up to date with chapters on behavioural aspects, management in the community, rehabilitation, geriatric medicine and the role of the social services, general practitioner, and the nurse. However, the list of authors hidden at the end would be better placed at the beginning where it could be seen more easily, and in any future edition the imbalance should be rectified between the adequate numbers of references cited in chapters on specialist medical and behavioural aspects and the paucity in those dealing with other topics. Nevertheless, for the surgeon or gastroenterologist interested in incontinence this book will be valuable and can be recommended.

R J NICHOLLS

**Adelantos en Gastroenterologia** By Luis Bustos Fernández and Aldo O F de Paula. (Pp 356. Illustrated. Price not quoted.) Potosi 42 15, Buenos Aires, Argentina. 1980.

An interesting book containing a wide variety of gastroenterological topics has been produced by Dr Luis Bustos Fernández and Dr A O F de Paula from the University of Buenos Aires. The book is under two main headings the first concerned purely with physiological topics,

and the second with disorders of function relating to important gastrointestinal diseases. About half of the chapters are contributed by South American authors, and the remainder are contributed by a most impressive international cast.

Several of the chapters are based on presentations given by visiting speakers at recent Argentine congresses of gastroenterology. Although of course the text is in Spanish, much of it is easily understood by English-speaking readers. It has been well produced in a compact form, and is a most useful source of up-to-date information on a wide range of topics from bile acids and the microflora of the intestine through gastrointestinal hormones, mechanisms controlling transport, motility, and immunological response. British contributors include Drs Polak, Bloom Baron, and Eastwood, and several European countries and the United States are well represented. Dr Bustos Fernández is to be congratulated on producing this fine book, and it is anticipated that additional volumes in a series may appear before very long. The appearance of this particular book is a fitting tribute to the thriving state of gastroenterology in the Argentine Republic.

I E GILLESPIE

## CANADIAN GASTRO-INTESTINAL RESEARCH

Competitions are now in progress for the following two groups of grants, relevant to Inflammatory Bowel Disease.

**1 Two and Three Year Research Training Fellowships —**  
commencing 1981

**2 Research Grants of up to \$40,000 —**  
commencing 1981

Full details and application forms for the above, are available from:

THE CANADIAN FOUNDATION FOR ILEITIS AND COLITIS (National Office),  
294 Spadina Avenue, Toronto, Ontario  
M5T 2E7

## Drugs and Disease

The Proceedings of a Symposium  
organised by the  
Royal College of Pathologists

Edited by  
Sheila Worledge

Price: Inland £3.00;  
Abroad US \$7.50  
including postage

The Publishing Manager, JOURNAL OF  
CLINICAL PATHOLOGY, BMA House  
Tavistock Square, London WC1H 9JR

UNIVERSITY OF MANCHESTER, MEDICAL SCHOOL, STOPFORD BUILDING

## 2nd INTERNATIONAL SYMPOSIUM ON MUCUS IN HEALTH AND DISEASE

1st – 4th September 1981

Reviews by international authorities in the fundamental aspects of the Biosynthesis and Physical properties of epithelial mucus, and in the Clinical and Basic Science areas of the Gastrointestinal, Respiratory and Urogenital systems.

*Topics and speakers include:*

- A. Silberberg (*Rehovot, Israel*) **Structure and Function of Mucus**
- H. Schachter (*Toronto, Canada*) **Biosynthesis of Mucus Glycoprotein**
- G. Forstner (*Toronto, Canada*) **Clinical Aspects of Gastrointestinal Mucus**
- A. Allen (*Newcastle, UK*) **Biochemistry and Physiology of Gastric Mucus**
- L. Reid (*Boston, USA*) **Clinical Aspects of Respiratory Mucus**
- J. Gallagher (*Manchester, UK*) **Biochemistry of Respiratory Mucus**
- M. Elstein (*Manchester, UK*) **Clinical Aspects of Cervical Mucus**
- E. Chantler (*Manchester, UK*) **Metabolism of Cervical Mucus Glycoprotein**

The submission of abstracts is invited for inclusion in the free communication sessions. The cost of registration, single accommodation, meals and published proceedings is £134, in addition a full social programme is available.

Further details, registration and abstract submission forms may be obtained from:  
**Dr. E. Chantler, Department of Obstetrics & Gynaecology,**  
**University Hospital of South Manchester, Nell Lane, West Didsbury, Manchester**
