(Technical Editor)

Gut publishes original papers and reviews concerned with practice and research in the field of gastroenterology. The field is that of alimentary, hepatic, or pancreatic disease, and papers may cover the medical, surgical, radiological, or historical aspects. They may also deal with the basic sciences concerned with the alimentary tract, including experimental work. A case report will be accepted only if it deals with a clinical problem which has been studied in detail and the resulting data provide material for further research.

COMMUNICATIONS Two copies of papers and figures should be addressed to the Editor, *Gut*, BMA House, Tavistock Square, London WC1H 9JR. Papers are accepted only on the written understanding, signed by all authors, that they are not published elsewhere without previous sanction of the Editorial Committee, and that all authors agree to publication in *Gut*. Manuscripts should follow the Vancouver conventions (see *Br Med J* 1979; 1: 532-5. *Gut* 1979; 20: 651-2). They should be in double-spaced typewriting on one side of the paper only. On the paper the name of the author should appear with initials (or distinguishing first name) only, and the name and address of the hospital or laboratory where the work was performed. A short summary should be provided at the beginning of the paper.

ACKNOWLEDGEMENT OF MANUSCRIPTS Manuscripts will not be acknowledged unless a stamped addressed postcard or international reply coupon is enclosed.

ILLUSTRATIONS *Photographs* Unmounted photographs on glossy paper should be provided. *Diagrams* These will usually be reduced to 2½ in wide. Lettering should be in either Letraset or stencil, and care should be taken that lettering and symbols are of comparable size. Illustrations should not be inserted in the text, they should be marked on the back with Figure numbers, title of paper, and name of author. All photographs, graphs, and diagrams should be referred to as Figures and should be numbered consecutively in the text in Arabic numerals. The legends for illustrations should be typed on a separate sheet. *Tables* Tables should be numbered consecutively in the text in Arabic numerals and each typed on a separate sheet.

ETHICS Ethical considerations will be taken into account in the assessment of papers (see the Medical Research Council's publications on the ethics of human experimentation, and the World Medical Association's code of ethics, known as the Declaration of Helsinki (see *Br Med J* 1964; 2:177)).

SI UNITS All measurements except blood pressure are expressed in SI units. In the text they should be followed by traditional units in parentheses. In tables and illustrations value are given in SI units, but a conversion factor must be supplied. For general guidance on the

International System of Units and some useful conversion factors, see *The SI for the Health Professions* (WHO, 1977). **NB: Such conversion is the responsibility of the author.**

REFERENCES These follow the Vancouver system - that is, references numbered consecutively in the text and listed numerically with titles abbreviated in the style of *Index Medicus, Standard journal article* - (list all authors when six or less; when seven or more, list first three and add *et al*): James A, Joyce B, Harvey T. Effect of long-term cimetidine. *Gut* 1979; 20: 123-4. **NB: Accurate punctuation is essential.**

CORRECTIONS other than printers' errors may be charged to the author.

REPRINTS Twenty-five reprints will be supplied free of charge. Further reprints will be available on payment of the necessary costs; the number of reprints required should be sent to the Publishing Manager on the form provided with the proof.

NOTICE TO ADVERTISERS Application for advertisement space and for rates should be addressed to the Advertisement Manager, *Gut*, BMA House, Tavistock Square, London WC1H 9JR.

NOTICE TO SUBSCRIBERS *Gut* is published monthly. The annual subscription rates are available on request to the Subscription Manager, *Gut*, BMA House, Tavistock Square, London WC1H 9JR. Orders can also be placed with any leading subscription agent or bookseller. (For the convenience of readers in the USA subscription orders, with or without payment, can also be sent to: *British Medical Journal*, Box 560B, Kennebunkport, Maine 04046. All enquiries, however, must be addressed to the Publisher in London.) All enquiries regarding Air Mail rates and single copies already published should be addressed to the Publisher in London.

COPYRIGHT © 1984 *Gut*. This publication is copyright under the Berne Convention and the International Copyright Convention. All rights reserved. Apart from any relaxations permitted under national copyright laws, no part of the publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means without the prior permission of the copyright owners. Permission is not, however, required to copy abstracts of papers or articles on condition that a full reference to the source is shown. Multiple copying of the contents of the publication without permission is always illegal.

SPASMONAL

Until now, no antispasmodic has been reliably assessed directly within the sigmoid colon . . .

SPASMONAL HAS.

... and demonstrated to produce a significant reduction in colonic motor activity . . .¹

SPASMONAL HAS.

... not only reducing the spasm,² but also relieving pain and cramps . . .

SPASMONAL HAS.

... and, because Spasmonal acts selectively, minimising side-effects, the only effect it has is the one you want for your patients.

Alverine citrate

SMOOTHES AWAY GUT SPASM.

Prescribing Information Presentation: Blue/grey opaque hard gelatin capsules each containing 60 mg Alverine Citrate USNF XIII. **Uses:** Selective smooth muscle spasmolytic. **Dosage and administration:** Adults 1 or 2 capsules one to three times daily, orally. No specific dosage recommendations can be made for children. **Contra-indications, warnings, etc.:** Nil. **Pharmaceutical precautions:** Store in a cool dry place. **Legal category:** P. **Package quantities:** 100 capsules. **Basic NHS cost:** £6.98. **Further information:** Alverine citrate is a synthetic, non-narcotic, non-habit forming spasmolytic of a low order of toxicity in comparison with other anti-spasmodics. It is related to (but more than twice as active as) papaverine, and has a specific effect on the smooth muscle of the intestine and uterus, but not on those of the respiratory or cardiovascular system. **Product licence number:** 0322/5014. **References:** 1. Trotman, I.F. (awaiting publication). 2. Evangelista, I (1966) West. Med. 3, 49.

FUNCTION AND DYSFUNCTION OF THE SMALL INTESTINE

Proceedings of the Second George Durrant Memorial Symposium

edited by R.M. Batt and T.L.J. Lawrence

This symposium, held in March 1983, provided the opportunity to bring together basic scientists, clinical gastroenterologists and veterinarians with a research interest in the small intestine. This book contains major articles by the twelve invited speakers, acknowledged experts in their fields, and these multi-disciplinary papers have a predominantly mechanistic theme. The topics show a natural progression including descriptions of the normal small intestine, current concepts of peptides as integrators of intestinal function and the adaptive potential of the mucosa. Adverse reactions to food, viruses and bacteria illustrate the application of morphological, biochemical and immunological approaches to the understanding of intestinal damage. This multi-disciplinary book should therefore be of interest to a diverse audience with either basic science or clinical interest in the small intestine.
