

Supplemental Figure 7

Supplemental Figure 7 KC-specific expression of miR-206 drove M1 polarization of KCs. (A) mRNA levels of M1 marker genes in hepatocytes of AKT/Ras mice injected with pT3-CD68p-scramble (control, $n=6$, 5 w.p.i) or pT3-CD68p-miR-206 ($n=6$, 5 w.p.i) (Mann-Whitney test). (B) mRNA levels of M2 marker genes in KCs of two groups of mice (Mann-Whitney test). (C) Serum levels of IL-10 and TGF β 1 in two groups of mice (Mann-Whitney test). Data represent mean \pm SEM. ** $p < 0.01$, *** $p < 0.001$ and ns: no significance.
